

## Capital Cities Collaborating on Common Challenges in Hazardous Waste Management Yerevan, Warsaw, Tirana

Project co-funded by  
the European Union

The title of the project	Name of the grant beneficiary	Country	A short description of the project	Project total value (in EUR)	Level of EU funding (in percentages)
Clean City	G Host company	Armenia	<p>The "Clean City" project introduces a web and mobile app for efficient waste management. It features three user types: Admin, Drivers, and Users. The Admin can set collection schedules, monitor tasks, and oversee waste disposal. Drivers receive daily routes to optimize waste collection and reduce fuel usage. The app allows Users to request garbage collection, specify waste types, and choose pickup times. This app aims to enhance waste management efficiency, promote proper disposal, and streamline the process for a cleaner and more sustainable city.</p>	44928.45	90%
