Improving HHWM system through development of a web application and education for youth change behavior	Barleti University (Universiteti Barleti)	Tirana, Albania	<p>Tirana Schools Lab Rehab Program – is an educational programme targeting public schools. Within the Project it will involve vocational schools, whose chemistry and biology labs maintain and use hazardous substances necessary to training activities.</p> <p>Students will learn about chemical safety practices and be informed on how ensuring a safe HW disposal at school premises.</p> <p>The project is built into two pillars: (1) developing and introducing innovations and digital application in HHWM, and (2) Improving patterns of youth behaviour towards HHW through education (Tirana Schools Lab Rehab Program).</p> <p>Smart solution: creation of a modular, open source online application on HHWM. The app will provide HW disposal and safety recommendations, give information on local disposal opportunities, allow users to keep track of the types and quantities of HW they have at home, and others.</p>	EUR 43 606,50	88%
